CAREER OBJECTIVE

Entry-level Software Engineer with strong fundamentals in Java, OOPS, Data Structures, DBMS, and SQL. Seeking an opportunity at reputed company to contribute to scalable enterprise applications while learning and growing in an Agile development environment.

EDUCATION

Bachelor in Computer Application (BCA)	8.1 CGPA
Veer Bahadur Singh Purvanchal University, UP-IN	2021-2023
Relevant Coursework: Data Structures, Algorithms, Database Management, Software Engineering.	

TECHNICAL SKILLS

Languages: Java, Javascript/TypeScript, SQL, Python (Basics)

Frameworks & Technologies: React, Node.js, React Native, Next.js, Tailwind CSS, JWT, RESTful APIs, GraphQL, Docker, Spring Boot (Basics), Hibernate/JPA, Maven

Developer Tools: VS Code, Postman, Git, Github, Github Actions (CI/CD), Expo

Databases & Cloud: MySQL, MongoDB, Firebase, AWS (EC2, S3, Lambda, RDS, etc.)

Core Concepts: OOPS, Functional Programming, Microservices, Agile/Scrum, SDLC, OS (Basics), Computer Networks

TRAINING / INTERNSHIP

Software Development Training | Self-Driven Projects

Dec 2024 – Present

- Followed Software Development Life Cycle (SDLC) to design, develop, test, and deploy applications.
- Implemented OOP principles using Java and JavaScript.
- Developed RESTful APIs and integrated databases using SQL and MongoDB.
- Performed debugging, unit testing, and code optimization.
- Worked in Agile-based development approach.

PROJECTS

VShop (Web, MERN) Live Code	Sep 2024
<ul style="list-style-type: none">Developed a full-stack web application using JavaScript, React, Node.js, and MongoDB.V-Shop platform serving authentication, product, and order modules.Designed REST APIs reducing API response time by ~25% through optimized queries.Implemented JWT-based authentication and Microservices Architecture.	
Money Planner (Mobile, React Native) Code	Jan 2025

- Built a cross-platform mobile application for expense tracking.
- Implemented CRUD operations and database integration.
- Used modular coding practices and debugging techniques.

SmartBuddy (Web, Next.js) Live Code	Aug 2025
<ul style="list-style-type: none">Developed a full-stack web-based application for automated code analysis.Integrated third-party APIs and followed clean coding standards.Deployed application following SDLC best practices.	

ACHIEVEMENTS

- Solved 100+ Data Structures & Algorithms problems (LeetCode, GFGs).
- Completed 1200+ hours of hands-on coding practice.

SOFT SKILLS

- Problem Solving, Analytical Thinking, Team Collaboration, Communication Skills, Adaptability.
